Local News

A carload of Whippets arrived last week at the Mirror garage.

Mr and Mrs Shoemaker left on Monday for Calgary for a visit with Mr Shoemaker's sister.

Mr Trotter has completed his dwelling at the new beach and will likely move into it this week.

Our beach has turned out to be a wonderful success which is evidenced by the large crowds that have assembled lately. Mirror has needed a resort of this kind some time, and the beach will fulfill the demands of all our pleasure seekers.

Mr and Mrs McCormack and Mr and Mrs A.W. King were Calgary visitors this week taking in the Stampede.

Mr and Mrs Gee Thomas arrived in town Monday from a two weeks visit in Banff.

Parking in the street at a late hour is being practiced very extensively in the east end of town.

Mr and Mrs Scott were Big Valley visitors this week taking in the stampede.

Got a new lease on life with Harold Lloyd's laughs. They're "Speedy" Showing Friday and Saturday.

Mr and Mrs E. Webster are spending the holidays at the coast.

Mrs Robt. Still was taken down suddenly Wednesday morning with an absence of the ear.

Frank Armitage is taking in the Stampede.

Misses Fernie Bell and Leona Olson are spending a week at Sylvan Lake.

Mr and Mrs A. Cormack and family are spending a couple of weeks at Banff.

The W.I. are asking all those interested to be at the cemetery at 9.30 Friday evening.

Tenders for Painting

Tenders will be received for the painting of Hickling school and outbuildings and barn. The above buildings to receive two coats of paint. The school board will furnish paint; work to be done as soon as possible. The school house to be wire-brushed. School house 20x34 with porch in front. Barn is 20x28. For further particulars write to

Surprise Party

The members of the Bushaw Women's Guild, and the Mirror W. A., accompanied by their husbands, held a surprise party on July 9, at the home of Mr and Mrs Morgan, on the occasion of their fifteenth wedding anniversary.

The evening was spent in card games. Mrs Jay of Mirror, and Mr Holt of Bushaw winning the first prizes, the consolation going to Mrs Whittingback of Bushaw and Mr Wolferstand of Mirror.

A dainty luncheon was then served under the direction of Mrs Astle and Mrs Durrant of Mirror, and Mrs Holt of Bushaw. In a few well chosen words Mr and Mrs Morgan expressed their surprise, and delight at the assembly of their friends, and they were presented with a large basket of linen, a gift from the two societies. Mrs Holt president of Bushaw W.G. made the presentation.

The regular meeting of the Mirror Library W.I. in July took the form of a Canadianization meeting. The roll call was answered by our favorite Canadian hero. It was decided to apply for the travelling operative clinic for 1929 providing the surrounding school Districts such as Ripley, Hickling, Lake Bend and George School District also Mirror wished to take advantage of the same.

Mrs Powell was appointed to represent the W.I. and the W.M.A. was appointed to represent the W.I. to view the different school boards and that the required committee could be formed to obtain this clinic. At the close of the meeting Mrs Oldring gave a splendid address on Canadianization.

Some Prize Winning Recipe

Following are some recipe submitted by the Mirror W.I. which have taken prizes in the province:

Recipe using Canadian products.

Fish Salad with Cucumbers. Season one and one half cups cold flaked fish with salt, eavenne and lemon juice. Cover and let stand 1 hour. Add 1 cup of cream, whipped to a cream salad dressing. Mix with fish and chill in a mold or individual molds. Peel and slice or chop two cucumbers. Season with salt, pepper vinegar and garnish molds, after turning them on serving dish.

Using Canadian products.

Vegetable Souffle. One quarter cup butter. One quarter cup flour. One third cup cream. One third cup water in which the vegetables have been cooked. One cup cooked vegetables mashed (carrots, turnips, or onions). Yolks and whites of three eggs.

Melt butter, add flour and pour on gradually cream and butter. Add vegetable, yolks of eggs beaten till thick and fold in stiffly beaten whites. Add seasonings salt, pepper, a dash of celery salt. Turn into a buttered baking dish half an hour in a slow oven.

APPLE FLOP

Fill a buttered deep pie plate with sliced apples. Sprinkle with half a cup of sugar and nutmeg. Cover with a muffin batter and bake till apples are done. Turn upside down on a serving dish. Cover with whipped cream and sprinkle with chopped nuts.

Canadian Arctic Explorer Heads Expedition For Purpose Of Locating the Magnetic Pole

In quest of treasure relics and to conduct important Arctic research work, Major L. T. Burwash, war veteran, Arctic explorer, engineer and Canadian government official, will leave shortly on a 5,000 mile journey to the North Pole.

Traveling by rail, boat and dog team, Major Burwash will traverse nearly 900 miles of icy Arctic waters, with only native Eskimos, a stray dog or two, and a team of dogs to navigate a forty-ton government launch. His destination at the magnetic pole cannot be reached until late in September or October. His task will be completed before the return of spring.

At "the top of the world," Major Burwash will make a scientific examination to determine the extent to which the magnetic pole has shifted since the first accurate location was made about 1868. Each year the magnetic pole varies in a westerly direction; and its present position, once secured, will be noted on the charts of mariners who ply the seven seas. A portion of the great exploration of Sir John Franklin, central figure in the chapter of Arctic exploration of the nineteenth century—will also be sought by Major Burwash. The explorer, his wife and servant, carrying the Franklin party, met disaster near the magnetic pole in 1845. Some of the records were found on Boothia peninsula; and it is said that one of these ships may be seen in the northern ocean. The search for King William Island or Boothia Peninsula. If this theory is found to be correct, the ship may be lifted to obtain for Canada the invaluable records and relics believed to be aboard her.

The remains of the Franklin

expedition, 12-year-old son of the late Captain of Puduketa. The rajah died recently of internal complications in the American hospital at Neuilly, Paris. The rajah was 53 years old. He was born in India and educated in the Indian department to the North West Territories and Yukon branch early this year. An examination of navigating conditions in Franklin Strait and Peel Sound is planned in September. Major Burwash will investigate the proposed tractor-train route from Wager Bay on the west coast of Hudson Bay to Cockburn Bay south of King William Island.

Use Modern Methods

Birds Ride On Airplanes and Horses On Motor Trucks

Airmen find that birds are not afraid of airplanes as they used to be. Now birds have learned to use them to help them along in their flights. It is not uncommon, among men say, to find ten or twenty birds roosting a ride, all comfortably settled on the machine and being relieved of their effort and fatigue on a long flight.

Not long ago we saw two horses being hauled to market on a motor truck at a swifter pace than any horse ever traveled before. They seemed to be in the society of *Capper's Weekly*.

To Preserve Children

"Take one large sandwich, one half dozen eggs, two or three small dogs a pinch of brook and some pebbles. Mix the children and dogs well together and put them in the field, stirring constantly. Pour the brook over the pebbles and sprinkle the field with some Spanish moss, a deep blue sky and bake in the hot sun. When brown remove and place in a bath tub to cool." —Health Bulletin.

First Lamb: "Do you suppose it's safe to go onto that lawn while the dog's asleep?"

Second Lamb: "Well, I wouldn't go on it."

"Look here, why are you following me about all day?"

"My protection. My wife has threatened to beat me!" —Poor Mrs. Madrid.

W. N. U. 1740

A YOUTHFUL RULER

Martanda Sydney, 12-year-old son of the late Captain of Puduketa. The rajah died recently of internal complications in the American hospital at Neuilly, Paris. The rajah was 53 years old. He was born in India and educated in the Indian department to the North West Territories and Yukon branch early this year. An examination of navigating conditions in Franklin Strait and Peel Sound is planned in September. Major Burwash will investigate the proposed tractor-train route from Wager Bay on the west coast of Hudson Bay to Cockburn Bay south of King William Island.

Turning the Tables

Automobilist Receives Bill For Damaged Auto To Locomotive

Tony Steiner's warning to auto motorists to be careful when driving your car into a railroad train became no barrier to damage the locomotive.

Tony's car and a Grand Trunk train were involved in an accident on the right-of-way at Waukegan, Illinois near 104th Street, Chicago, last November. The automobile wound up in a ditch in a station described by wrecker writers as "twisted wreckage."

Recently Tony got a letter from the Grand Trunk Railroad. It made no mention of his automobile, confirming to the succinct sentence: "Enclosed please find bill for \$29.15 for damage to our locomotive No. 6638."

Getting Over the Difficulty

A man who had great difficulty in getting words that had "et" and "ie" in them mentioned the matter to a friend.

"Oh," said the friend, "I have a splendid remedy for that. It's infallible, too. I've used it for years and years now. You just yell."

The first was expressed his delight and interest, then waited for enlightenment.

"The rule is this," the friend declared, "write 'your' and 'e' exactly alike, and be sure and put them exactly between the pair of them."

Not Much Competition

The United States Office of Immigration was examining an Englishman on his arrival in New York. "And what do you propose to do now you are in the United States?" he inquired.

"Oh, I don't care," replied the Englishman, "anything to earn honest living." "Well, come along in, then," said the official. "I guess there isn't much competition in your line of business."

Up-to-Date Shop

Fifth Avenue, New York, has a shop dealing exclusively in aviation products and accessories. Everything for use on flying aircraft, dirigibles to a commercial ship. The shop maintains hangars on Long Island with a corps of instructors to teach those who make purchases.

The keener the critic—the more cutting the criticism.

ALL FOODS CONTAIN WATER

Premier of Newfoundland Body Gets Sufficient Even If People Drink Little

Water is absolutely essential if the body is to keep up its activities. It is necessary not only to aid in building up new tissue, but in order to permit the carrying on of all of the chemical and physical functions that take place.

Most of us get more water than we drink as such through the fact that usually every food substance contains some water. Tea and coffee beverages are practically entirely water. Milk contains 88 per cent. water, wines anywhere from 83 to 95 per cent., and even distilled alcoholic drinks are usually more than half water.

If both food and water are withheld, life cannot be prolonged for more than eight or ten days. With this amount of water to be provided for a considerable time, however, food is not given. Professional fasts always drink water during the starvation period. Some of them carry on from three to five weeks without food.

Milk is probably the best of all beverages, particularly when it is taken from properly inspected cows under sanitary conditions, transported under refrigeration to the place where it is used, and sterilized in most instances before use.

Lemonade and other drinks made from citrus fruits are excellent because they counteract acidity in the body and serve as a valuable source of vitamin C.

Tea and coffee are good beverages if taken in moderation; if taken in excess, overstimulation may result due to an overdose of the drug called caffeine. Tea is the most popular drink in the United States, especially in the higher centres of the brain. Tea varies in its qualities according to the manner in which it is prepared.

One expert recommends that the person who wants to make tea to stop putting it leaves after five minutes, putting it in another warmed teapot.

Soda water, pop and similar beverages have a carbonic acid due to the amount of carbonate they contain. —By Dr. Morris Fishbein.

Sure To Be Successful

It is yearly becoming more difficult to peddle young women in the practice in the country. Young doctors who have plenty of courage and are determined to succeed and who go to settle in the country and practice—those can do it. Those who are intelligent make a queer and bigger success than three-fourths of their colleagues who have settled in the cities. If they do not actually attain great fame, which is reserved for a few, public life often takes hold of them, bringing honors with it.

Mugs Have Been Some Clock

The Provost of the little Scottish town was noted for his many eccentricities. One day he insisted on the occasion of the presentation of a clock and a purse to a local resident who was leaving the town.

"The contents of the purse," said the Provost, "will in time inevitably disappear, but," he added, placing his hands on the clock, "here is something which will never go."

Footprints, taken on the lines of our fingerprint system, are now being used for identifying criminals in Ceylon.

The fact that Nero was a fiddler instead of a saxophone player must have been some satisfaction to him.

Great political reforms are set in motion by the hand that rocks the cradle.

Premier of Newfoundland

Geographical Misconceptions That Have Retarded The Development Of Canada

Partial knowledge and assumptions based on insufficient data have been responsible for many mistakes judgments and belief in obstacles that had no real existence. Evidence of this abound in the pages of history, and the process of re-examination is changing long-established opinions continually with little sign of abatement. Until recently people believed that the interior of the island continent of Australia was a vast, barren desert, where explorers ran grave risk of perishing miserably for lack of water. Now, with more extensive and accurate knowledge, the vast central region of Australia has assumed a widely different aspect, with many districts well adapted for pastoral use and with ample water resources, that only need to be tapped to make the wilderness blossom as the rose.

Canada is now undergoing a similar evolution, with the result that many obstacles to the development of interest once deemed insurmountable now disappear in the light of better knowledge. Not so long ago men whose views were regarded as narrow and shortsighted said the clay belt of North Ontario and the so-called barren lands of the great Northern barriers that doomed Eastern and Western Canada to perpetual isolation, from one to the other. These barren, backwater, infertile tracts occupied an area almost as large as the size of the Dominion. Until recently these ideas remained fixed convictions in the minds of most Canadians, accepted without question, regardless of nature and incapable of modification, due to limitation to a limited degree. Gradually, through the penetration of these regions by the surveyors and prospectors of the topographical survey, it appears that these ideas become evident that the older conception is due to racial bias.

Officials and travellers, in the days when Central and Western North America were unknown quantities, often registered judgments for or against the country, which now seem ridiculous. A British official sent to Brandon to condemn the territory, now occupied by the states of Oregon and Washington, as worthless because "no Indians live there." The Indians, however, were not the only ones who were interested in the country.

Our present book illustrating the north of Canada, practical to everyone who is likely to be interested in the country, presents the case.

The Farm As An Industrial Adjunct

Edison Thinks Farm Should Produce Something Besides

The common conception of the farm is that it is designed solely to produce those things by the consumption of which we are enabled to live. Having fulfilled that purpose, there is no other field or purpose for the farm.

But Thomas A. Edison advances a new thought in this connection. He says the farm should be made an industrial adjunct to the food producing medium. "We over-produce," he says, "but Mr. Edison's prices are too low to give the farmers a profit. So the extension of non-food uses for farm products is a sound, practicable and important idea."

Just now Mr. Edison is experimenting with some hundreds of wild plants that will grow in various parts of this country, to test their rubber-producing qualities. Up to date he has collected some 1,600 of these. The first wild plant to appear in his experimental plot of nine acres so far, it has been found that 80 of our wild plants contain rubber. At least twelve of them, says Mr. Edison, will grow on the southern cotton and tobacco country. The "Golden rod, pink, golden rod that grows wild in nearly every state, is one of the best sources of rubber that I have found among native plants," he announced.

It is the desire of Mr. Edison to discover the basis of his theory. His thought is that some of the energies of the farmer will be turned in the future to the production of things that are needed in the world. Some advice to our farmers: If man has made in utilizing what used to be waste material of the farm, Straw makes paper and cellulose is obtained from corn stalks. And, of course, we can not eat cotton and wax, even if Mr. Edison is going to encourage the farmer to grow golden rod for its rubber, we hope that he will be able to divert it as its propensity to spread hay fever sniffles.—The Buffalo Courier-Express.

A Great National Asset

Holiday Travel Has Increased Can-ada's Revenue

Travel to Canada is a place with the Dominion's greatest financial assets. According to government returns, revenue from vacationists in the Dominion grew from \$57,375,000 in 1920, to \$190,463,000 in 1926. This is estimated to be the net balance of tourist traffic, after deducting the expenditures of Canadians in other countries, amounted to \$106,420,000, representing an invisible export exceeded only by Canada when it was reported in 1927 all the provinces recorded in excess of travel over the previous year, and the total revenue according to the Dominion from this source is declared by the minister of the interior to have been approximately \$200,000,000. It is believed that this total will be doubled within the next ten years.—Regina Leader.

Toys For Baraz Of Nations

Carved from wood by the toy-makers of the Orient, and including an assortment of quaint toys and trinkets have arrived at the Red Cross headquarters at Regis. They are to be shown at the Bazaar of Nations which is being held by the Salvation Army. The collection includes a tiny menagerie of wooden ducks, turtles, rabbits and fish, and even minute wooden ladylings. As quaint as the articles are, the interest is in the voice of which which shows that a "stunkey" is a baying and a "sheev' eyk" a wooden horse.

David Lloyd George first came into prominence when he campaigned against the Boer War in 1900.

Pale brown is the normal color of mourning in Persia.

Person: "Don't you feel sorry when you condemn people to many years to prison?"

Judge: "What about you when you marry them?"—Tyrianos, Oslo.

W. N. U. 1740

CHINESE ARE NATURALISTS

Have Greater Knowledge Of Insects Than Any Other Country

Chinese folk have many odd ways of keeping insects and things to contribute to their idea of plants.

For instance it seems strange to the occidental mind that cricket should be cultivated and cared for because of their fighting powers and musical ability.

Of the many insects that are capable of producing musical sounds, writes Dr. B. Laufer, Curator of Anthropology of the Museum of Natural History, New York, "the foremost are the crickets who during the latter part of the summer and in the autumn fill the air with a continuous concert. They are well known on account of their abundant distribution, the singular characteristic chirping and the habit they have of having sex life in human habitations."

The relation of the Chinese to crickets and other insects presented in this article is the most curious chapter of culture-historical development. In the primitive stages of life man took a keen interest in all he observed and discovered, and became a center of the brewing and blossoming of the civilization. From

Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended and the League of Nations came into being it was thought that, with the termination of the war in all its forms, there would be little opposition on the part of any country to join the League, and that, with 100 per cent world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations, the countervailing idea originally—caused by a desire to attain the advantages of peace without disengaging from the rest of the world—led to renewed activity in the putting up of armaments. Nevertheless, the League struggled on, gaining new adherents, and, with each succeeding success in settling international disputes and preventing open ruptures, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof, it was felt that no guarantee for world peace was impossible and incomplete.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

All the great nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a Treaty. The draft of this momentous international document is brief and to the point, and, as it may well prove to be the Magna Charta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind."

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that peaceful and friendly relations now existing between their peoples may be perpetuated."

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any arbitrary power which shall hereafter seek to protect its national interests by resort to war should be denied the benefits furnished by this treaty."

"Desirous of being encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficial provisions, thus uniting the civilized nations of the world in a common determination that war was an instrument of national policy."

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czecho-Slovakia, France, Germany, Great Britain, India, Irish Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

To what do they give their strong approbation? The declarations in the preamble are as follows:

"Article I. The high contracting parties declare that the settlement on terms of peace or of conflict of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means."

"Article II. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at the seat of the League."

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power deposited at the seat of the League, and this treaty shall immediately upon such deposit become effective as between the power thus adhering and the other powers parties thereto."

That is the whole document, beautiful in its simplicity, momentous in its sweepin renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No hostiles are left, and should any nation signing the treaty ever again resort to war it would become, as never before, an outlaw among the nations.

Substitutes Cards For Pistol

"Why not settle the affair at cards?" another man suggested. The men agreed, and sat down at the card-table to play for a stake of £1,500. The business man won.

Another Great Possibility

Passengers May Soon Be Transferred From Moving Train To Dirigible

Transfer of passengers to and from moving trains by dirigibles was demonstrated at Belleville, Ills., as a "practicable possibility of the near future," by Col. John A. Paegelow, Veteran commandant of Scott army camp.

Paegelow based his opinion on the successful "dirigible-to-train" transfer of a military unit in which a 210-foot non-rigid blimp synchronously flew along side of the train, in the rear, that of a moving Illinois Central train.

The dirigible came to rest on top of a coach for a period of few seconds, enough to effect the transfer of a pouch of mail without difficulty.

The army blimp which made the test carried a crew of six men.

A Wonderfully Performance

Recent Flight Over Pacific Was Great Achievement For Pilots

The great flight over the Pacific Ocean by the Australian, Captain Kingsford-Smith, leader, and his companions, puts British prestige at the peak in this form of endeavor. The Southern Cross crew found its way to San Fran under control of four men, each performing an essential task in making the trip scientifically safe and sane. This feature alone values the Pacific flight out of the category of regular daylight flights, and emphasizes notably the merit of the performance. Regular radio reports received from the Southern Cross during its flight robed the sun of some of its glory won by the fliers. Their accomplishment is the more valuable because they made use of every possible device to combat the fury of the elements with man's most powerful weapons.

How DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, especially of sleep, and especially exercise. But the girl who must have new, rich blood, and nothing meets a case of this kind like a good meal.

These pills not only enrich and increase the blood supply, they help the weary back and limbs, thus bringing new health and strength to the girl who has given birth to a healthy baby.

The value of Dr. Williams' Pink Pills for Girls is well known.

Dr. Williams' Pink Pills were recommended and almost from the first day of their use, Dr. Williams

was needed to restore my strength. After taking the pills for a time I got up in the morning feeling bright and active, and ready for work or play. I am now in excellent condition.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with alkali, which neutralizes the acid and removes it in acid.

The right way is Phillips' Milk of Magnesia—just a teaspoon dose of water. It is pleasant, efficient, and

herbal. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost immediately.

You will never need another method.

Write for the genuine Phillips'

Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Phillips' contains full directions—any druggist.

Scotland's War Memorial

Pictures in Bronze and Glass Commemorate Her Part In Great Struggle

England's war memorial is also the Empire's noblest. By the simple conception of the Unknown Soldier in Whitehall, the highest and the humbled heads of the British Empire are joined in a reverent tribute. But gone for the moment is another memorial, the one which commemorates the war dead of Scotland.

Perched on the topmost pinnacle of the Castle rock, it is, there in Edinburgh. The walls of this war shrine are built of stone, a massive granite barracks, expanded and extended by portico and apses. The floor of polished granite is boldly punctured with the names of all regiments that have fought in the field. The four exports of honey from the Dominion have increased at the rate of over two hundred per cent.

In every city of the Western provinces, in the provincial and the remarkable and rapid increase in production, Eastern apists had to look about for new markets, naturally turning towards export. Larger supplies have also called for higher quality in the product.

Standardization provides the only guarantee of quality, and the demand for honey grades has now come. These men have given their best, and are being drafted by the department. The intention is to apply them in the first place to the export trade.

The highest priced honey on the market of Canada comes from New Zealand, where commodity grading for export has been in force for fourteen years. The lowest priced honey on that market is from Australia and India. This is simply packed and stored, and may be easily made, in control the shipments Canadian producers, through the marketing of a standardized graded product, are destined to realize a larger share of the world's market.

On this rock has been erected a green altar stone, typifying everlast remembrance. Above hangs the Arched Angel, with seven arches above him, and on the stone stands a steel coffee cup. In this coffee lies rolls of honor. In these rolls of honor are encircled one hundred thousand Scottish names. Every man mentioned gave his life King and Country.

The walls round about are thick encrusted with records of the war in splendid bronze, in rich stained glass, in carver letters in sandstone rock.

In coming ages the conscious sense may become as lost and vague as the Runic scrolls which now puzzle archaeologists in the mid-night twilight of the Greeks. Yet will these records stand, and the bronze and stone tell the story of Scotland's sacrifice. Trophies, loaded to the scuppers with men and men, and yet more men going up the galleys.

"Trojan Horse," "Wounded Companions," "Sacrifice on lonely headlands." The Last Post. Torpedoed marines.

Treachery—Training camps. Women making munitions. —The tunnelers' friends, the rats and the little birds. Gas, gas, gas! Every man a hero. Every woman. Daring horses. The Scotch collies that can war messages—Ships in dazzling paint, dodging submarines.

Everything the war touched in Scotland, everything of Scotland that touched the war, is commemorated in picture by Sir Robert Lorimer's bronze friezes and Dr. Strachan's stained glass.

Not one word, not one letter could be spared from the modest inscription setting forth, amid the regimental shields and service badges, the stunning facts of the war, and of Scotland's part in the war.

Don't shirk duty for pleasure. Do your duty and pleasure will follow.

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for aches and pains. She could not go about much with the other girls in the school as she was not strong enough. She got well and it did her a great turn. She is working out now in a store and walks miles to get home. I am still in the evening."—MRS. MARY VANCE, 44 Langton Road, Sydney, N. S.

Finewood, Ont.—"I constantly had pains in my back and side and about two years ago I began to have taken three boxes of Lydia E. Pinkham's Vegetable Compound daily. They have been a great help and I always have them in the house. I have recommended your good medicine to many friends. Even it to my 17 year-old girl."—MISS ALICE OWELETTE, Finewood, Ontario.

HONEY SHOULD BE GRADED

Standardization Provides the Only Guarantee Of Quality

By WALTER H. COOPER, Director of Research, Canadian Honey Council

1,658,712 pounds having been shipped last calendar year to Europe and the United States, Holland with 691,566 pounds, the British Isles with 400,400 pounds, Germany with 140,000 pounds, France with 100,000 pounds, and Australia with 80,000 pounds.

During the past few years exports of honey from the Dominion

have increased at the rate of over two hundred per cent.

In every city of the Western provinces, in the provincial and the remarkable and rapid increase in production, Eastern apists had to look about for new markets, naturally turning towards export. Larger supplies have also called for higher quality in the product.

Standardization provides the only guarantee of quality, and the demand for honey grades has now come. These men have given their best, and are being drafted by the department.

The intention is to apply them in the first place to the export trade.

What Makes Quicksand

Water or Gas Which Keeps Grains Separate Causes Powder Section

By WALTER H. COOPER, Director of Research, Canadian Honey Council

Quicksand is the name given to

sand which is incapable of holding up material. Though it is bottomless, it is not necessarily bottomless.

It is bottomless because the sand is

like oil, a sealer with a thin film

over it.

Damning the sand, and it is

still difficult to penetrate, but sand is

—mix it with a quantity of water

and keep the mixture stirred—and

the pencil pierces to the bottom with ease.

This is due to the fact that the

water holds the grains separate

and the sand is

—separated from the water.

For Rheumatic Pains.—The pain

and stiffness of Scalp and Rheuma-

tic should be treated with Dr.

Mendelsohn's famous heart

specialist of Germany. The organ

is simply a governor to control

the heart's action and to regulate

the constant outgo and intake of liquid

caused by chemical action in the

body cells. He further declared re-

cently that he found the heart

as the size of a man's fist would not

possibly be capable of driving the

tenacious mass of blood through the

entire body."

An Old System

Employer: "I trust you are not

the kind of workman who drops his

tools and runs when the whistle blows."

Applicant: "Oh, no sir, I always

had my tools packed away long be-

fore the whistle blows."

An Old System

Employer: "I trust you are not

the kind of workman who drops his

tools and runs when the whistle blows."

If a man is not great in little

things he lacks the element of true

greatness.

After all it isn't exactly a carol

for that stray Prince in England.

QUEER SEA ANIMALS TAKEN TO ENGLAND

"Mermaids" Caught By Sailors Are Anything But Beautiful

The first "mermaids" ever seen in England, landed at Plymouth recently from the liner Madura.

According to sailors' fables, mermaids are beautiful creatures, but the particular specimen could only be described as ugly beasts. There were four of them—husband, wife, and two children—and paternalia was easily the ugliest of the quartette, all of whom, by the way, were fearfully looking creatures, with heads singularly like human ones, both in size and shape, large mouths, well-proportioned noses and whiskers, big chest which was impressively of great strength, and long tails ending with fins. They were nine feet in length and tipped the scale at 48 pounds. The tough and leathery skin of their human-like forms was which they possessed. Father was provided with tusks and a fine crop of whiskers. His and his spouse and their two "boys" came to an untimely end when they were washed ashore during a monsoon.

These "mermaids" are not infrequently encountered in the Red Sea, though they seldom catch fish. Fishermen are looked upon with a certain amount of awe by the fishermen. Therefore, when this particular family was jetisoned on the beach by the monsoon, August, 1926, the Royal Mountain sheep, an equal number of deer, 5,000 to 6,000 caribou, 3,000 to 5,000 moose, 2,000 elk and 2,000 to 3,000 black, cinnamon and grizzly bears, as well as large numbers of beaver, otter, marten, mink, marmot, marten, etc.

The wild life of Jasper Park is indicative of what may be found in the other great Canadian national parks of Banff and Waterton. Together, these areas are according to approximate estimates, some 15,000 Rocky Mountain sheep, an equal number of mule deer, 5,000 to 6,000 caribou, 3,000 to 5,000 moose, 2,000 elk and 2,000 to 3,000 black, cinnamon and grizzly bears.

The creatures made frantic efforts to get back into the sea again, and when they failed to do so, uttered loud barks, which sounded like dryings from exposure and exhaustion.

They came into the possession of a Mr. Fischstein, a collector of "mermaids" who had lived at Aden for 10 years, and he now has brought his entire family to Canada.

He attested his bona-fides with a letter attesting his bona-fides and a photograph of himself.

WORLD HAPPENINGS BRIEFLY TOLD

The new German dirigible, LZ-127, may make a trip to East Asia by way of California.

Miss Mercedes Gletsz, London stenographer, failed in an attempt to swim the Irish Channel to Great Britain.

Assurance that representations made on behalf of the blind in Canada will receive government consideration has been given to a delegation of blind persons by Hon. A. J. E. Hobson, Minister of Finance.

The Canadian government, the appointment of Sir John Matheson as Governor-General and Commander-in-Chief of Newfoundland, in succession to Sir William Allardice, whose term has expired.

The University of Wisconsin, at Milwaukee, gave recognition to all the盲men of its celebrated former student, Col. Charles A. Lindbergh, by conferring the honorary degree of Doctor of Laws. Lindbergh arrived there by plane.

Flying Van Opel rocket car, the D-1, has reached 100 miles per hour, not until after it had attained a speed of 155 miles an hour. This is claimed as a world record on rails. There was no driver in the car.

England's most picturesque visor, Sir Offir Alcock, has been potential King of the Alphas, has survived the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy of \$100,000,000 for himself. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarce each year, as reflected in a circular issued to the world. It is indicated in a statement issued by the Department of Fish and Game, which shows that royalties received last year totalled \$112,762, compared with \$10,793 in 1926. While the trapping of beaver eliminated the amount is likely to be still smaller for 1928.

How Far Voice Will Carry

Depends On Atmosphere, Wind and Competing Noises

The distance to which a man's voice will carry depends upon many different factors. The density of the atmosphere is one—damp will slow down the sound-waves while a dry, crisp air will forward them easily. Wind is another factor, as is the angle of the sound waves in regard to the number of objects, rocks and so on in front of him. The number of competing noises also has to be considered. Under ordinary circumstances few voices can be distinguished more than a couple of hundred yards, but this distance has been far exceeded with exceptionally favorable conditions. In the stillness of the frozen North, for instance a voice will carry over a mile. And a song, as rendered from a mountain-top, was once heard at a distance of four miles.

Question Of Relationship

In a recent court case at Toronto, to name quite a few cases at Toronto, was tried against a chauffeur. "Isn't he your brother-in-law?" she was asked by counsel. " Didn't you say he was?" "No, I said he was my son's step-husband's brother." The counsel gave up any more questioning on this point.

It has been estimated that a hospital doctor walks an average of 16 miles a day in the course of his duties, a staff assistant eight miles; a waiter 12 miles, and a tram conductor seven miles.

Raw recruits are probably so called because they are not accustomed to fire.

Mistress: "Is there anything we require from town?"

Maid: "Yes, the chin will not last us over Sunday." —Kasper, Stockholm.

W. N. II. 1740

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

New experiences awaited us in the foreign countries. At the Port of London Authority, we were taken to see something of what London does in the way of port facilities, not possible to imagine than a small part, for the Port of London, in one year, handled goods to the value of hundreds of millions of pounds sterling. For example, the value of the port's imports in 1927 was \$3,500,000,000 and included 65,000,000 tons of coal. In 1926, the port's tonnage was 56,000,000 tons of shipping entered and left the port. Walking through one of the port's vaults, we entered and visited the Ivory Room, where we were astounded to see a perfect specimen of fresh-water pearls, 13 feet long, weighing 163 pounds, and having an average age of 56 years. The State Room, a large room of paper was 28 lbs. weight, containing 1,000 pieces of silver. The Wool Room, which contained a number of bales of Canadian wool stored in a single year.

Another interesting warehouse was the India Room, holding 20,000 small boxes of tea, each box weighing one pound \$500. The hide covering is necessary because of the rotting effect of the atmosphere. The wooden legs in a comparatively short space of time.

On the second day came when we explored a portion of the Port's wine vaults. Before descending the stairs, we were handed to a torch, fastened to a chain of steel. Staves, such as these have stood for 120 years, the temperature of the room never falling from 60 degrees, yet the only means of light are incandescent lamps and the ammonia gas given off by the fungi of the cellar.

In the brandy vaults this fungus is particularly prevalent. Twenty-two thousand pieces of wine, averaging 5000 cubic feet, are accommodated in these vaults which contain twenty-eight tons of metal barrels, each barrel holding 200 gallons of spirit, drawn from the barrels of spirits contained in other vaults which included rum in every vault.

Again on the open road we started a launch en route to the S.S. Minnehaha, to meet the chairman of the Marketing Board of the Empire Marketing Board in the Hyde Park Hotel. The chairman of the Marketing Board, Mr. Lord Ritchie of Dundee, a novelty of luncheon in this beautiful hall, was surrounded by green liners from almost every country. This was indeed a deep impression. This was followed by a return trip back to London.

On the third day we were the guests of the Empire Marketing Board in the Hyde Park Hotel.

The next day's programme provided one of the most interesting morning events, a visit to the Tower, a grim fortress where the bones of two hundred Princes were found and the room where Raleigh, when a prisoner wrote his History of the World.

The next day the Best Butcher-hands still luxuriating in Constantinople demands only the latest and newest models in automobiles. Some 21,000 second-hand cars are standing idle, waiting in vain for purchasers.

Nothing But the Best

Butcher-hands still luxuriating in Constantinople demands only the latest and newest models in automobiles.

Some 21,000 second-hand cars are standing idle, waiting in vain for purchasers.

URGE WHOLESALE SOCIETY TO COVER ALL OF CANADA

Lloydminster, Sask.—By a unanimous vote the congress of the Co-operative Union of Canada, meeting here, went on record as being of the opinion that the time had arrived for the establishment of a wholesale society covering the whole of Canada. This is set out in a resolution passed which urges the members of the wholesale society to attract an official to their Montreal and Winnipeg depots who will assist in the development of the movement in Canada.

Another resolution was approved, providing for the formation of a committee to investigate the practicability from the view point of economics, of a Canada-wide wholesale society, an organization for the three prairie provinces only, as well as one covering a district bearing on the whole question of consumers' co-operation.

All co-operative marketing organizations throughout the Dominion will be issued an urgent invitation to affiliate with the Co-operative Union of Canada. The importance of having the Wheat Pool affiliated with the Union was especially emphasized.

While the desirability of having all co-operative marketing organizations affiliated with the Union was recognized by different speakers on the subject, it also developed that the annual membership fee of affiliated bodies would help to solve the financial difficulties of the central organization.

The resolution as passed follows:

"That the appeal made to the societies that was made last year in order to increase the efficiency of the Union, and to have the co-operative marketing organizations to affiliate with the Union, is still in effect."

One delegate put a motion suggesting that the fee of the wheat pools be placed at one cent per member. This motion however, was never put. One fraternal delegate, representing the U.G.C., recommended that it be passed that the invitation to the pools to affiliate was for the express purpose of financing the Union.

The only co-operative organization now holding membership in the Union is the Great Lakes Co-op. It was stated by Secretary George Keen as a result of a question asked by J. H. Wesson, a director of Saskatchewan Wheat Pool, that he did not think that the fact that the U.G.C. had membership in the Union could be considered an obstacle to the pools becoming affiliated. He did not, however, give any indication that the pool would do so.

A resolution asking enactment of legislation providing administrative machinery to insure furnishing annually, financial and business statistics of co-operative societies in their respective provinces was approved by the congress.

World's Dairy

Congress Opens

Forty-Four Countries Represented At Conference in London

London.—Sixteen hundred delegates, representing 45 countries, assembled in London for the World's Dairy Congress under the auspices of the International Federation, whose banner is the King.

Lord Darnborough, president of the British Imperial Council of Commerce, presided. Hon. W. T. Motherwell, Canadian Minister of Agriculture, is representing the Dominion, while the delegates also include Lord Lonsdale.

The program is twofold, comprising presentation of technical and scientific papers, etc., and the visits to the dairying centres of England and Scotland.

Celebrates Anniversary

London.—The Duke of Connaught, former Governor-General of Canada, celebrated the sixtieth anniversary of his entry into the army by addressing the members of the army council. The Duke, who recently observed his 90th birthday, enjoys wonderful health and fulfills a constant series of public and social engagements, although he has eliminated evening engagements.

Receives Promotion

Winnipeg.—Robert Nelson Munro, assistant division commissioner of immigration for Western Canada, has been promoted to a post in the Division office at Ottawa, according to word received.

Wireworms Damage Saskatchewan Crops

Report Shows Activity Was Unusually Severe This Spring

Regina.—The wireworm damage done to Saskatchewan crops this year is by wireworms, according to the recently issued report of the Dominion Entomological Laboratory, Regina, on methods of control of the damage attributed to wireworms. It is stated, "Wireworm damage appears to have been unusually severe this spring due to the unusually dry weather." The damage to the most valuable grain and the fact that moisture was sufficiently high to enable the wireworms to keep working on much of the seed and particularly the lower part of the seed bed, were factors which gave of recovery has been noted as a result of the recent rains, which, however, may tend to lengthen the period of wireworm activity." The forest tent caterpillar infestation includes in the Lloydminster-Madceland District and the American tent caterpillar is unusually abundant in Western Saskatchewan.

Wrong Man Executed

Tragic Miscarriage Of Justice Reported From Germany

Berlin.—We therefore have no doubt that the unfortunate man was condemned to death and executed for a murder of which he was completely innocent.

This is the statement of the national secretary of the Free Socialist Party of Germany, Dr. Henry Marx. Dr. Marx, president of the national research council of Canada, who have returned to Ottawa, Mr. Malcolm and Dr. Tony, the two sides of the eye view of the trial, held at the court of standards at Washington with the object to introducing the latest methods in Canadian laboratories, to be given to Ottawa and, with the purpose of obtaining the services of the experts of other provinces to be given to scientists working in the field.

The announcement was accompanied by the dramatic disclosure that four men on whom evidence had been adduced had been arrested and have confessed that they themselves committed the crime for which this innocent man had suffered death.

Drowned When Car Plunges Into River

Accident Happened When Driver Took Turn Farm With Driver

Charlottetown, P.E.I.—Three young people, all natives of Elliot Lake, were drowned, and two others narrowly escaped drowning, when their car ran into a whirlpool in the fog and plunged into the river, at Southport recently. The deceased and survivors were all brothers and sisters.

George McLean had driven the car from New York, and took his brother and sisters out motoring, last night. They lost their sense of direction in the thick fog, and making a wrong turn, plunged over a whirlpool into the river.

Search For Lost Continent

Expedition Has Left New York For The Azores

New York.—An expedition in search of traces of the supposedly lost continent of Atlantis has left for the Azores.

The expedition's ship, named the Atlantic, was designed by Columbus O'Donnell Iselin, 2nd, of New York, captain of the expedition, and is equipped with machinery invented by Iselin, which is expected to dredge the ocean bottom at a depth of three miles.

All Murders Are Solved

London.—Twenty-four murders were committed in London last year, which were solved, according to a report by the Police Commissioner. Twelve persons were charged and ten murderers committed suicide, while one died in an asylum. The value of property stolen was \$2,821,000. Property recovered amounted to \$650,000.

Jews Promise Three Millions

London.—The Jews of the United States were pledged to raise annually a minimum of \$3,000,000 to make up for the next five years the annual budget for the rebuilding of Palestine as a Jewish national home in accordance with the terms of the mandate of the League of Nations entrusted to Great Britain.

May Try Westward Crossing

Pratt's Antarctic Westward crossing of the Atlantic by aeroplane may be attempted early in July. The trans-Atlantic airplane of Maurice Drouhet and Joseph Lebris should be ready before July 4. This flight will be a commercial venture. Lebris will be a speech at Lyons.

Winnipeg.—Robert Nelson Munro, assistant division commissioner of immigration for Western Canada, has been promoted to a post in the Division office at Ottawa, according to word received.

W. N. U. 1740

Lord Plumer Vacating Post In Palestine

Has Held Position As Commissioner For Three Years

London.—Field Marshal Lord Plumer will shortly vacate the high commissionership of Palestine, which he has held since 1925. The Daily Express, in an issue from its Jerusalem correspondent, says that his retirement will be brought about by Lord Plumer's differences with the British colonial office over the division of the cost of the Trans-Jordanian force as between the British Mandate and Palestine. Palestine having already a budget deficiency of \$5,000,000.

Lord Plumer commanded the second army during some of the most important operations of the Belgian campaign in the war, won by the Canadian forces took part. He was specially mentioned for good work in connection with railway and forestry battalions. Lord Plumer, who is 71 years old, is the son of Field Marshal Haig and has had constant contact with him during the war and he also commanded men from the Dominions in the South African war.

RESEARCH WORK IN CANADA TO RECEIVE IMPETUS

Ottawa.—Industrial and scientific research work in Canada will receive an impetus as a result of a visit planned to Washington by Hon. James Macleod, Minister of Trade and Commerce, and Dr. Henry Marx Toy, president of the national research council of Canada, who have returned to Ottawa. Mr. Malcolm and Dr. Tony, the two sides of the eye view of the trial, held at the court of standards at Washington with the object to introducing the latest methods in Canadian laboratories, to be given to Ottawa and, with the purpose of obtaining the services of the experts of other provinces to be given to scientists working in the field.

The announcement was accompanied by the dramatic disclosure that four men on whom evidence had been adduced had been arrested and have confessed that they themselves committed the crime for which this innocent man had suffered death.

Manitoba's tourist traffic for the 1926 season left over \$7,000,000 in the province, according to the Winnipeg Tourist and Convention Bureau. In the United States a total of 105,710 visitors came to the province of which 75,012 stayed for a day while 30,000 remained for longer time. The average stay of the tourists was 3½ days. The increase of car passengers in the province over those of the previous year was approximately 45 per cent.

In order that a more intimate knowledge of the Canadian Pacific Railway shipping terminals in the vicinity of Montreal might be gained, 150 traffic representatives of the various lines operating in the district were the guests of the C.P.R. in a recent tour of the various terminals. West Montreal, Athlone, Lachine, Mile End, East End, Old Montreal, Angus Shops, Hochelaga and Pointe Viger were among the terminals inspected by the manufacturers.

The Sir Joseph L. "Graham-Paige" motor manufacturing organization at the Vickery's Yards in Montreal, will be re-named the "Neoska" and placed in the British Columbia Coastal Service, according to C. D. Neoska, assistant manager of the service. The vessel will sail for St. John's, Newfoundland, and thence to Sydney, C. B., where she will load about 2,500 tons of steel and proceed to Vancouver via the Panama Canal. This will be the first trip of the "Neoska" under Canadian Pacific ownership.

An optimistic forecast for the future of Poland was made recently by Gerard Hyra, representative of the Canadian Pacific Railway company at Lemberg, Poland, who was interviewed in Montreal recently after completing an extensive tour of the Dominion and parts of the western United States. Mr. Hyra stated that he was impressed with the evident prosperity of the Polish immigrant settlers he had visited near Edmonton. The acute problem in Poland today is over-population, informed the European representative.

"To take an extreme case of Cubist art and attempt to force it on the public against their will is an intelligence, is folly," declared Leonard Richmond, R.B.A., well-known international painter, in an interview with the reporters of the Canadian Pacific Railways recently. Mr. Richmond is beginning a lecture tour of a number of Michigan and Illinois cities. He states that he is aiming to show that all art, even in its most apparently unintelligible form, is a legitimate development from all that has gone before.
